

Why this report:

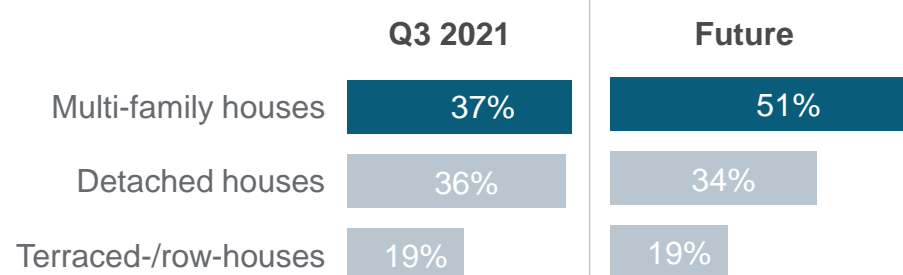

The percentage of Prefab solutions used in Europe varies significantly, while research shows that Prefab will grow the most in the construction of Multi-family houses. With this report, we wanted to capture the direction, changes and expectations that are happening regarding Prefab in the construction industry, based on the responses of 950 European architects.

**Share of Prefab users in Europe
(In the past 2 years)**

Prefab's share in past and future building types

*What kind of projects/ buildings contained prefab building elements?
In which building types do you expect the biggest growth of prefab?*

* The Full Report contains a list of over **10 types** of projects / buildings and a comparison with **2019**

Key research topics:

- Prefab familiarity and usage development
- Current and expected percentage of Prefab users
- Type of prefab elements to grow most in the coming years
- Type of projects and building parts for which prefab is applied
- Turnover and orderbook developments of architects
- Turnover expectations and forecast

Countries covered in the report:

The United Kingdom, Germany, France, Poland, Spain, Italy, Belgium and the Netherlands.

Methodology:

The report is based approx. 950 successful telephone interviews with architects in 8 countries.

Report cost

The full report covering 8 countries is now available for € 1,750.
