

Why this report:

The construction industry is contributing to climate change heavily and is therefore at the forefront to change the way of working. 40% of the annual global CO2 emissions are generated by buildings and the construction sector generates approximately 35% of worldwide waste. We do see several actions are being taken on the European level regarding the increasing issue the greenhouse effect is posing as a product of global waste and uncontrollable gas emissions. The biggest initiative to tackle these issues comes from the European Green Deal policy.

European Green Deal awareness among European architects

13%
Knowing what is it about

43%
Heard of it

44%
Don't know it

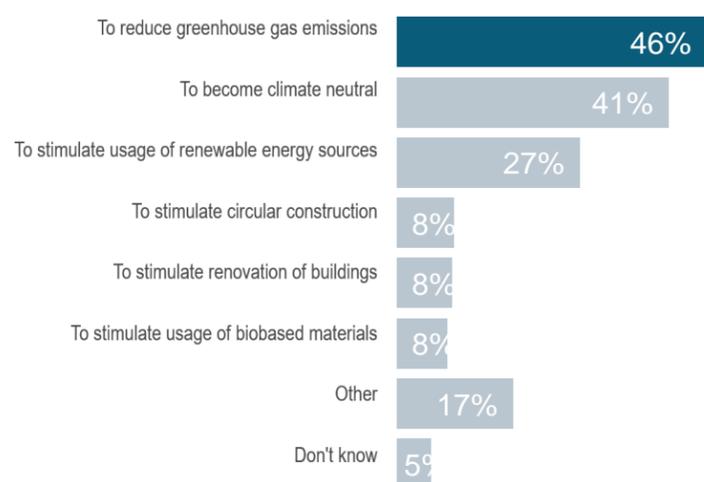

Belgium
Most informed about what EU Green Deal is about

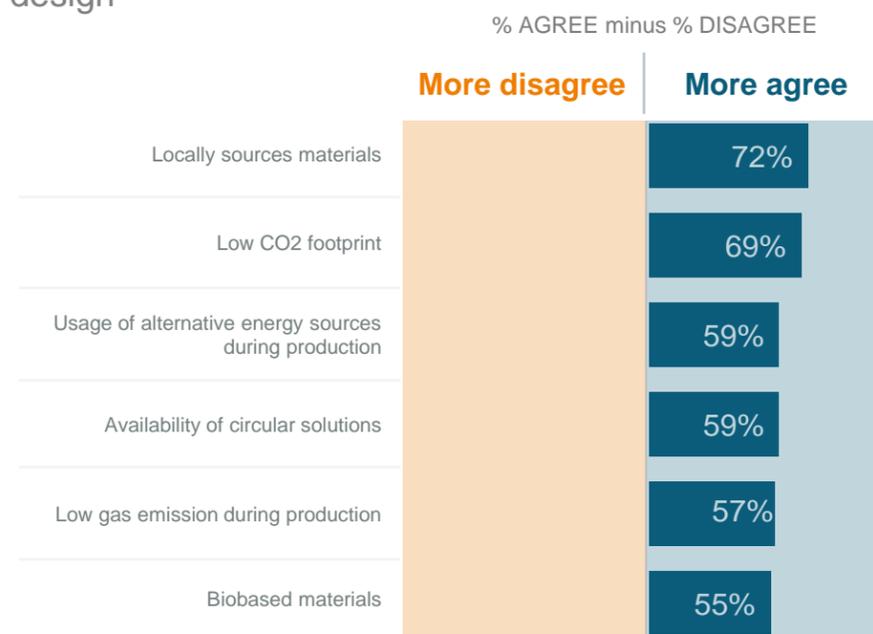

France
Mostly unaware of EU Green Deal

Goals of the EU Green Deal according to architects

Information criteria when selecting materials and design

Key research topics:

- Awareness of the European Green Deal and its objectives
- Expectations out of EU Green Deal in terms of climate-neutral construction industry
- EU Green Deal effect on projects
- Expectations from manufacturers
- Turnover and orderbook developments of architects
- Turnover expectations and forecast

Countries covered in the report:

The United Kingdom, Germany, France, Poland, Spain, Italy, Belgium and the Netherlands.

Methodology:

The report is based approx. 1,000 successful telephone interviews with architects in 8 countries.

Report cost

The full report covering 8 countries is now available for € 1,750.
